

# Year 5 Home Learning Activities - Autumn Term 2 2023

## RE

This term, in December, it will be the time of Advent.

To prepare for this time you could create your own Advent Wreath or draw, colour and label an Advent Wreath explaining the symbolism of the different colour candles and the evergreens.

## Maths

Our focus in maths this term is on multiplication and division.

Therefore your times table facts and the inverse facts are going to be incredibly important. Remember to play TT rockstars and practise recalling your times tables everyday.

How quick can you re-call all the times tables?.

## Reading

I love reading and sharing books with my classes and I am always on the hunt from some new reads.

So, this term I would like you to recommend a book for me to read. You may decide to write me a persuasive letter, record a short persuasive video or even just give me a persuasive speech one morning in class.

## History

Our topic this term is the Vikings. Could you build a Viking shield or Viking long-boat?

## Music

You may want to compose your own Christmas song using body percussion or record yourself singing a Christmas song.

## Science

We are focusing on Earth and Space.

You could create Top Trump cards for each planet or make your own solar system.
